1. Introduction

The National Academy of Sports (NAS) system is a **web-based platform** designed to help staff manage student records, attendance, visits, and campus security activities in a **centralized, secure, and easy-to-use system**.

One of the core features of the NAS system is the **RFID-based IN and OUT monitoring integrated with biometric or clock-in devices**. This allows the school to accurately track when students **enter or exit specific locations** such as buildings, dormitories, clinics, and other monitored areas.

Using RFID technology:

- Each student is issued an RFID card
- Students tap their card on a registered biometric or clock-in device
- The system automatically records:
 - o Student identity
 - Date and time
 - Location of the scan
 - IN (entry) or OUT (exit) status

This process reduces manual recording, improves accuracy, and strengthens campus security.

The NAS system can be accessed using:

- Desktop or laptop computers
- Mobile phones and tablets through a web browser

The system is **fully responsive**, meaning the interface automatically adjusts to different screen sizes. This allows authorized users to access the system conveniently anytime and anywhere.

This user manual provides **step-by-step, easy-to-follow instructions** to help users confidently navigate the system, including the proper use of **RFID/biometric check-ins**, even with little or no technical background.

2. System Requirements

To properly access and use the NAS system, please ensure the following requirements are met:

- Stable internet connection
- Updated web browser such as:
 - o Google Chrome
 - Mozilla Firefox
 - Microsoft Edge
 - Safari
- Desktop or laptop computer (recommended for administrators)

No software installation is required since the system runs entirely on a web browser.

3. System Access Information

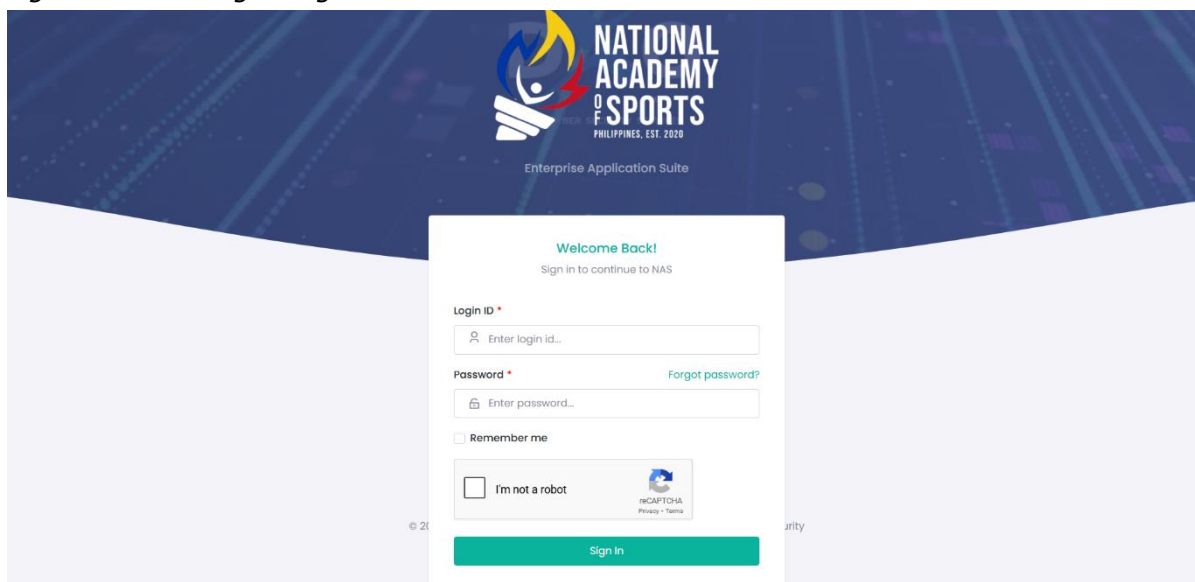

Use the following information to access the NAS system:

- **System URL:** <https://nas.dxocybersecurity.com/login>
- **Login ID:** -----
- **Password:** -----

Important: For security purposes, it is highly recommended to change the default password immediately after your first successful login.

4. Logging In to the System

Figure 0: NAS Login Page

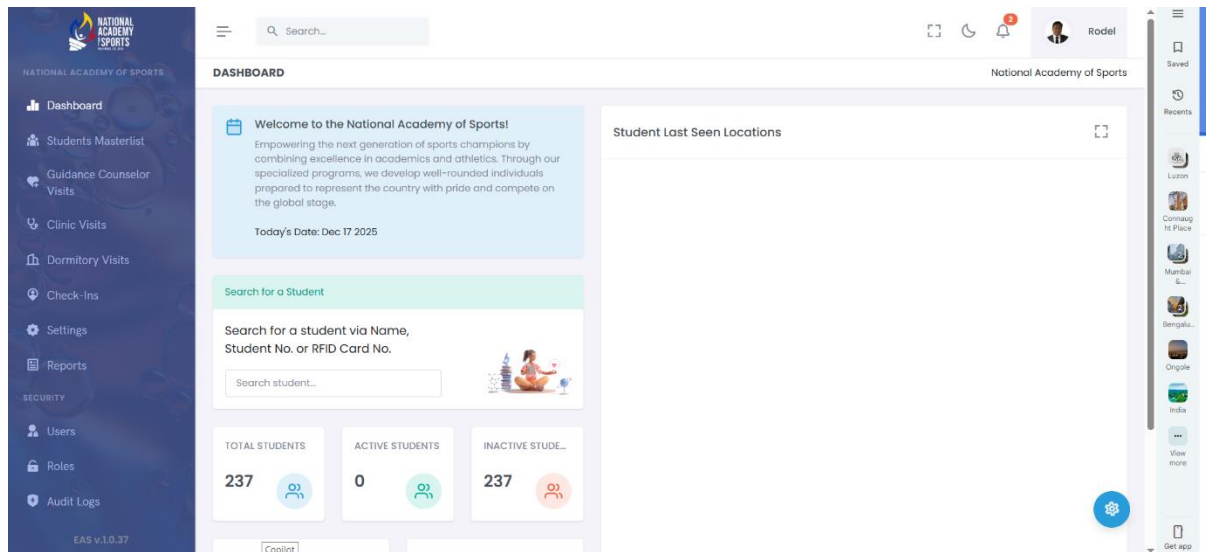

Follow these steps to log in:

1. Open your preferred web browser.
2. Enter the system URL: <https://nas.dxocybersecurity.com/login>
3. On the login page, enter:
 - Username: -----
 - Password: -----
4. Click the **Login** button.
5. If the login details are correct, you will be redirected to the NAS Dashboard.

5. Dashboard Overview

Figure 1: Dashboard Screen

The Dashboard is the **first screen displayed after logging in**. It provides a quick overview of important information and helps users access key features easily.

What you can see on the Dashboard:

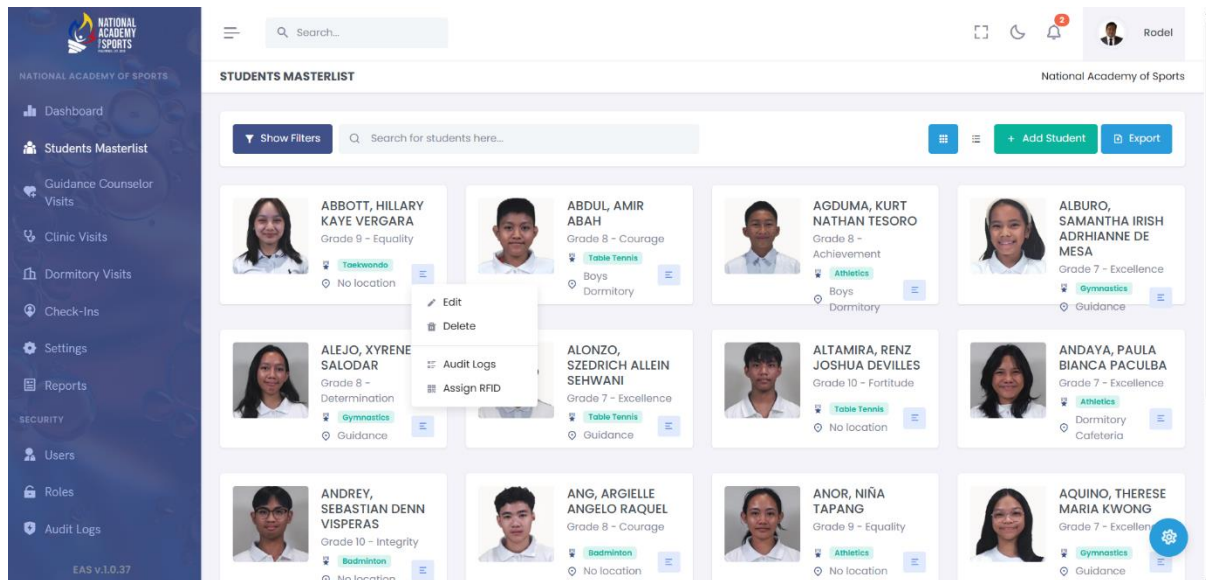

- **Welcome Panel** – Displays a short introduction and shows the current date.
- **Search for a Student** – Allows quick student lookup using:
 - Student Name
 - Student Number
 - RFID Card Number
- **Student Last Seen Locations** – Shows the most recent recorded location of students.
- **Student Statistics** – Displays:
 - Total Students
 - Active Students
 - Inactive Students

How to use the Dashboard:

1. Use the search bar to quickly find a student.
2. Review student statistics for monitoring and reporting.
3. Navigate to other modules using the left-side menu.

6. Students Masterlist

Figure 2.1: Students Masterlist Screen

The **Students Masterlist** is the central record of all enrolled students in the NAS system. This module allows authorized users to view, manage, and monitor complete student profiles in one place.

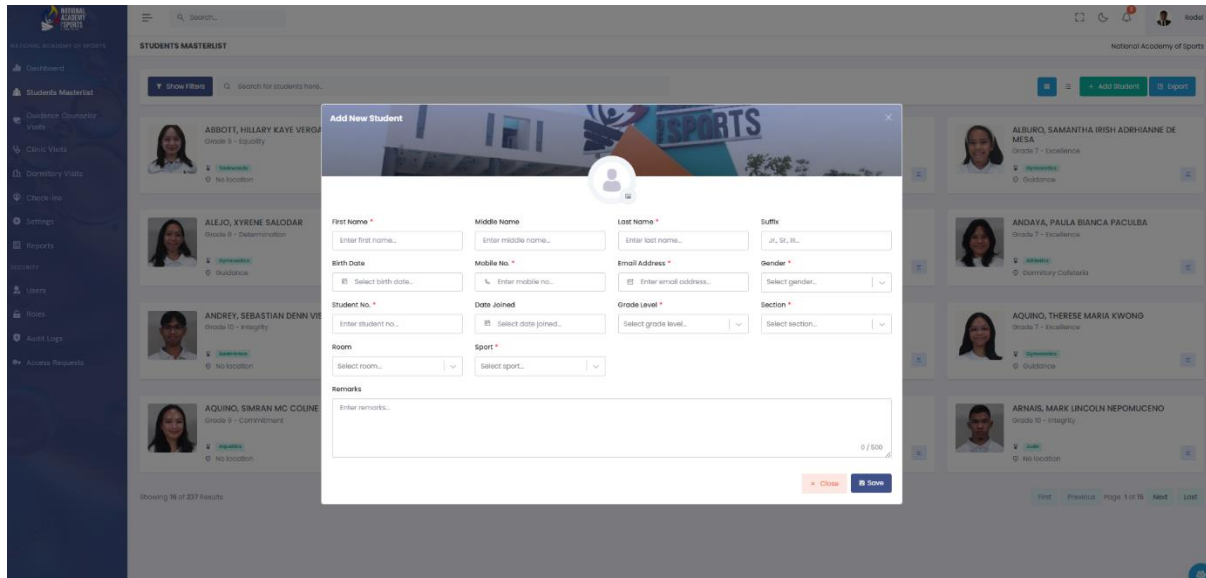

Students Masterlist Overview

When you open the Students Masterlist, you will see a list of all students registered in the system.

What you can see:

- Search bar to find students by:
 - o Student Name
 - Student Number
 - RFID Card Number
- List of students showing basic details such as name, student number, and status
- **Add Student** button

Figure 2.2: Add Student Screen

Add Student

The **Add Student** button is used to register a new student into the system.

How to add a new student:

1. Click the **Add Student** button.
2. Enter the required student information, including:
 - Full name
 - Grade level and section
 - Sports
 - Contact Details
3. Review the information for accuracy.
4. Save the student record.

Important reminders:

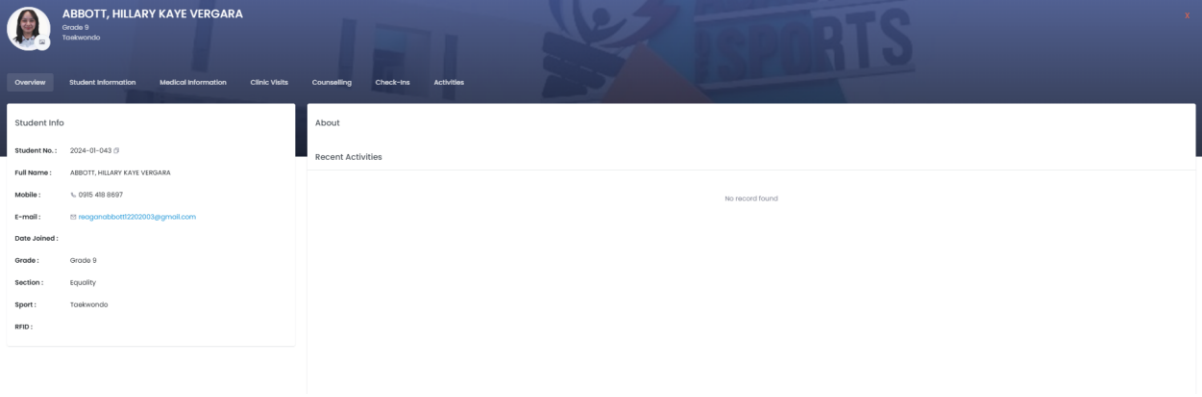

- Ensure all required fields are completed.
- Correct student information is critical for RFID tracking, clinic visits, and counseling records.

Viewing a Student Record

When you **click on a student name**, the system opens the student's detailed profile. This profile is divided into several easy-to-understand sections.

Student Profile – Overview

Figure 2.3: Overview Screen

The screenshot shows the 'Overview' tab of a student profile for Hillary Kaye Vergara, Grade 9, Taekwondo. The left sidebar lists navigation options: Overview, Student Information, Medical Information, Clinic Visits, Counseling, Check-ins, and Activities. The main content area is divided into two sections: 'Student Info' and 'About'. The 'Student Info' section displays the following details:

- Student No.: 2024-01-043 (3)
- Full Name: ABBOTT, HILLARY KAYE VERGARA
- Mobile: % 0915 418 8597
- E-mail: reagonabbott2202003@gmail.com
- Date joined:
- Grade: Grade 9
- Section: Equality
- Sport: Taekwondo
- RFID:

The 'About' section shows 'Recent Activities' with a message: 'No record found'.

The **Overview** section provides a quick summary of the student’s profile.

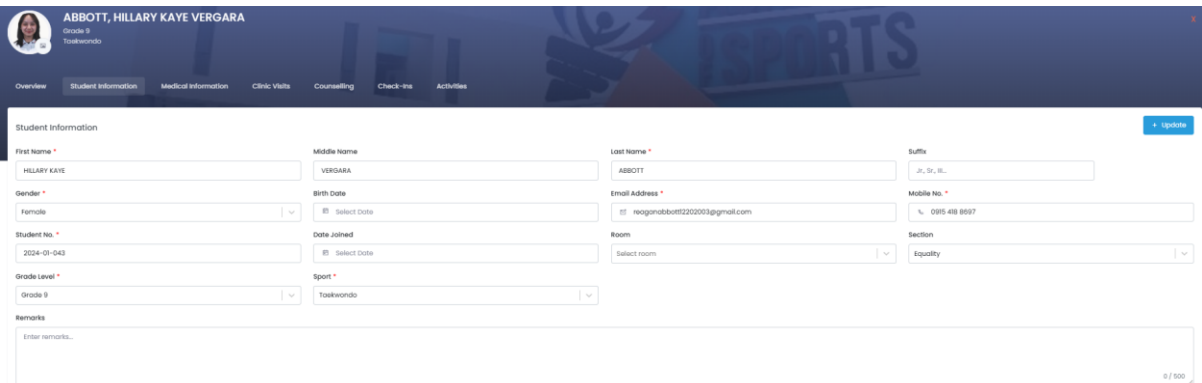

What you can see:

- Student full name
- Student number
- Current status (Active or Inactive)
- Assigned RFID card
- Recent activity summary

This section helps users quickly understand the student’s current situation without reviewing all details.

Student Information

Figure 2.5: Student Information Screen

The screenshot shows the 'Student Information' tab of the same student profile. The left sidebar is identical. The main content area displays a form with the following fields:

- First Name: HILLARY KAYE
- Middle Name: VERGARA
- Last Name: ABBOTT
- Suffix: Jr., Sr., III...
- Gender: Female
- Birth Date: Select Date
- Email Address: reagonabbott2202003@gmail.com
- Mobile No.: % 0915 418 8597
- Student No.: 2024-01-043
- Date joined: Select Date
- Room: Select room
- Section: Equality
- Grade Level: Grade 9
- Sport: Taekwondo
- Remarks: Enter remarks...

An 'Update' button is located in the top right corner of the form area.

This section contains the student’s basic personal and academic information.

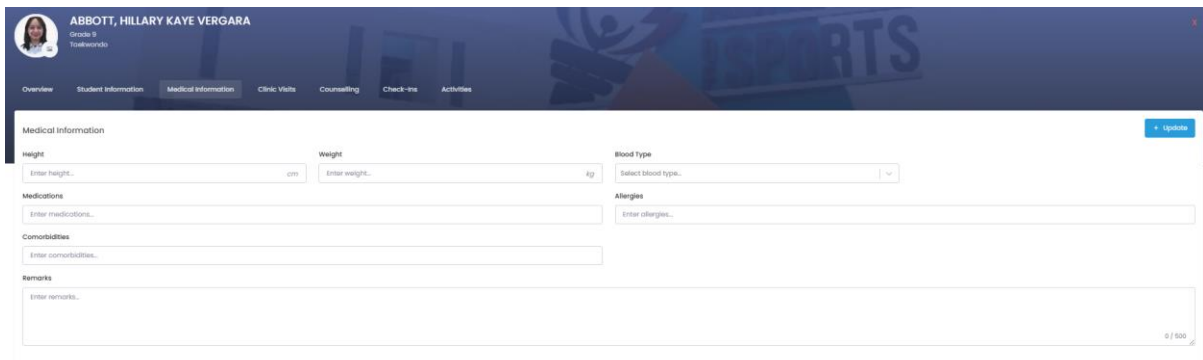

Information included:

- Full name
- Date of birth
- Gender
- Grade level and section
- Contact information
- Remarks

This information is used for identification and communication purposes.

Medical Information

Figure 2.6: Medical Information Screen

The screenshot shows a web application interface for a student's medical information. At the top, the student's name "ABBOTT, HILLARY KAYE VERGARA" and grade "Grade 9" are displayed. Below this is a navigation bar with tabs: Overview, Student Information, Medical Information (selected), Clinic Visits, Counseling, Check-ins, and Activities. The main content area is titled "Medical Information" and contains several input fields:

- Height:** A text input field with a unit dropdown set to "cm".
- Weight:** A text input field with a unit dropdown set to "kg".
- Blood Type:** A dropdown menu with the option "Select blood type..." selected.
- Medications:** A text input field with the placeholder "Enter medications..."
- Allergies:** A text input field with the placeholder "Enter allergies..."
- Comorbidities:** A text input field with the placeholder "Enter comorbidities..."
- Remarks:** A large text area with the placeholder "Enter remarks..." and a character count "0 / 500".

 An "Update" button is located in the top right corner of the form area.

The **Medical Information** section stores important health-related details of the student.

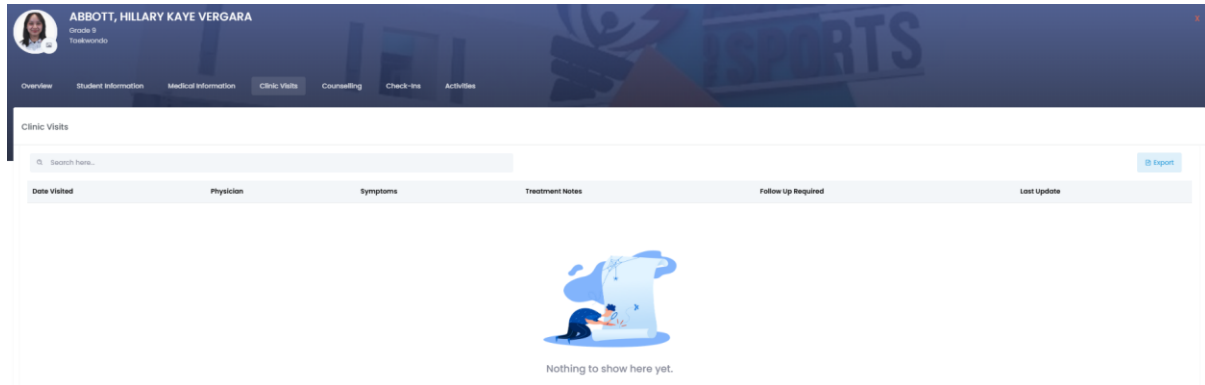

What you can see:

- Known medical conditions
- Allergies
- Special medical notes
- Emergency medical information

This section supports clinic staff and ensures proper care during medical visits.

Clinic Visits

Figure 2.7: Clinic Visit Screen

This section shows the student’s **clinic visit history**.

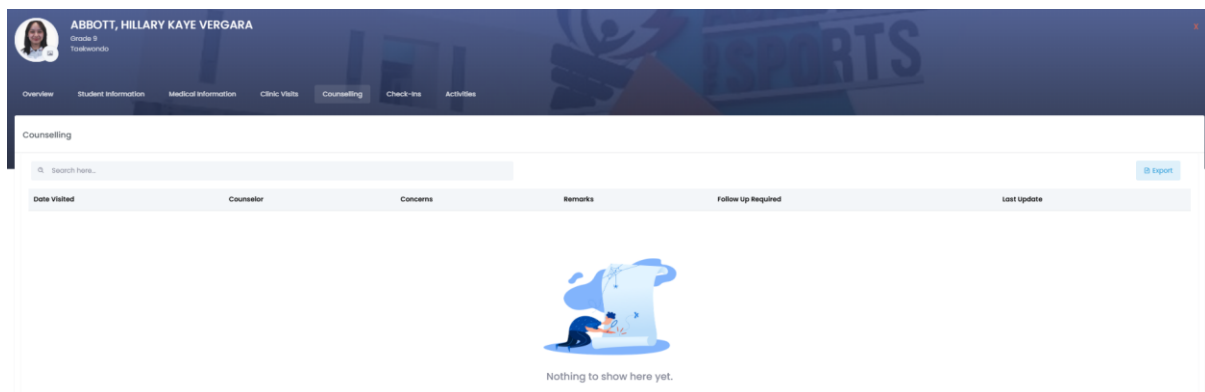

What you can see:

- Dates of clinic visits
- Reasons for visits
- Treatments provided
- Clinic staff remarks

This allows staff to quickly review past medical interactions.

Counselling

Figure 2.8: Clinic Visit Screen

The **Counselling** section displays the student’s guidance counselor visit records.

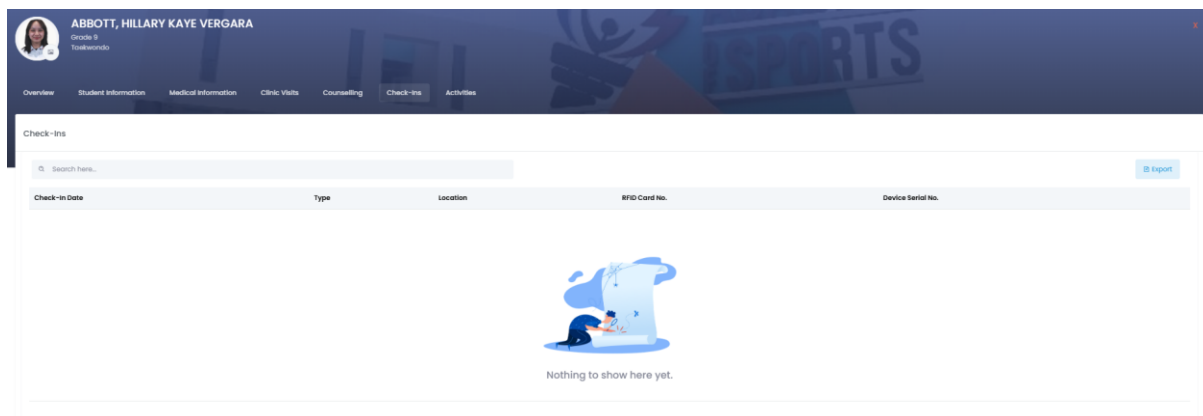

What you can see:

- Dates of counseling sessions
- Type of counseling provided
- Counselor remarks
- Follow-up notes

This helps counselors maintain continuity of care.

Check-Ins

Figure 2.8: Check-Ins Screen

The **Check-Ins** section displays the student's RFID / biometric IN and OUT records.

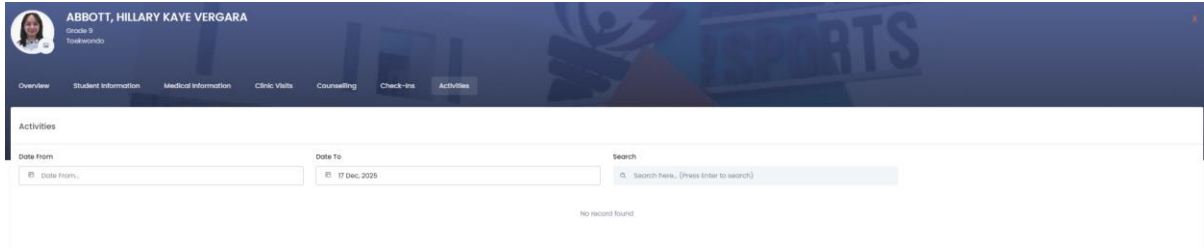

What you can see:

- Date and time of each check-in or check-out
- Location or device used
- IN or OUT status

This section is important for attendance tracking and security monitoring.

Activities

Figure 2.9: Check-Ins Screen

The **Activities** section shows a record of system-related activities involving the student.

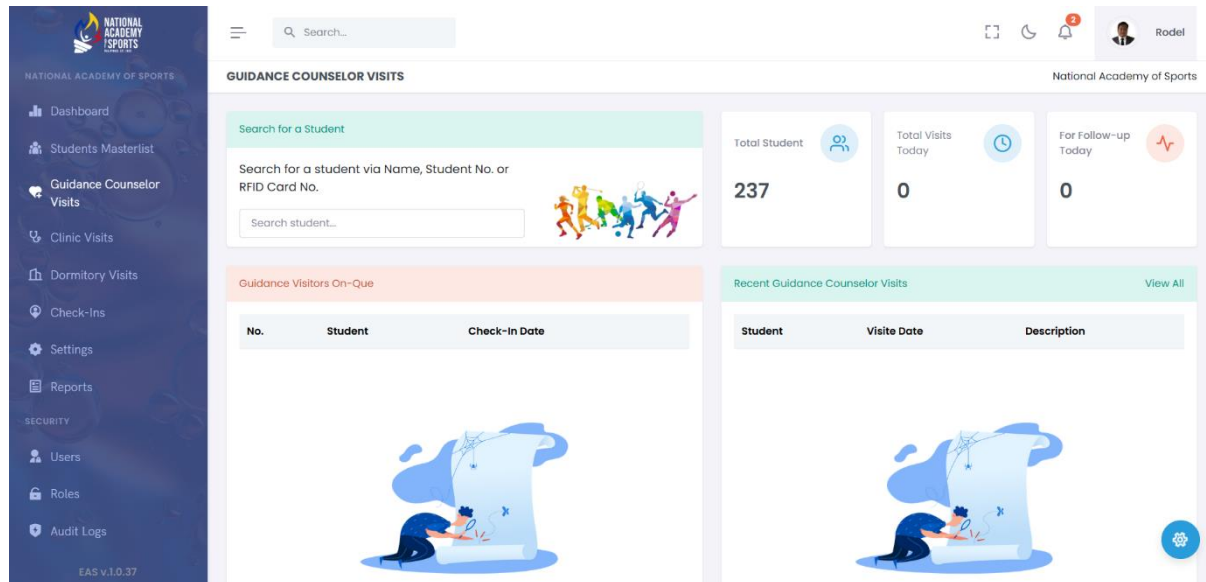

- **Examples include:**

- Profile updates
- RFID assignments
- Status changes

This helps administrators understand changes made to the student's record.

7. Guidance Counseling and Athletic Wellbeing Section Visits

Figure 3.1: Guidance Counselor Visits Screen

This module is used to monitor and manage student visits to the Guidance Counselor. It helps ensure that student concerns, counseling sessions, and follow-ups are properly recorded and tracked in one place.

What you can see:

- Search for students by Name, Student No., or RFID Card No.
- View **Total Students**, **Visits Today**, and **For Follow-up Today**
- Track students currently **On-Queue**
- Review **Recent Guidance Counselor Visits**

Recent Guidance Counselor Visits

This section displays a list of the most recent counseling visits.

What you can see:

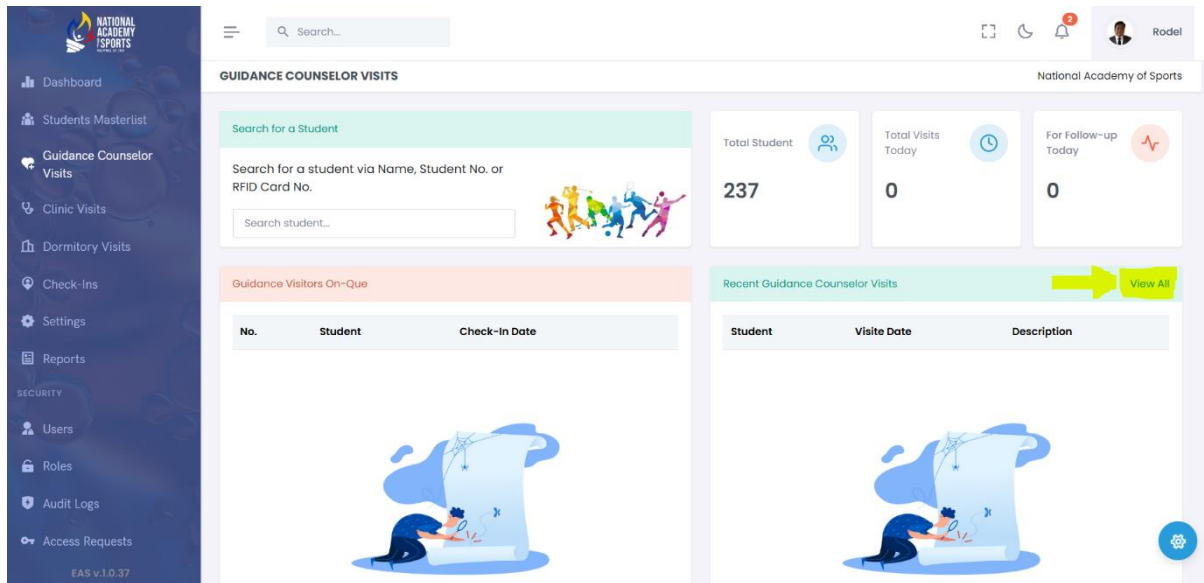

- Student name and details
- Visit date and time
- Type of counseling session
- Remarks or notes from the counselor

How to use:

1. Review recent visits to monitor student concerns.
2. Click **View All** to see the complete list of guidance counselor visits.

View All Guidance Counselor Visits

Figure 3.2: Recent Guidance Counselor Visits Screen

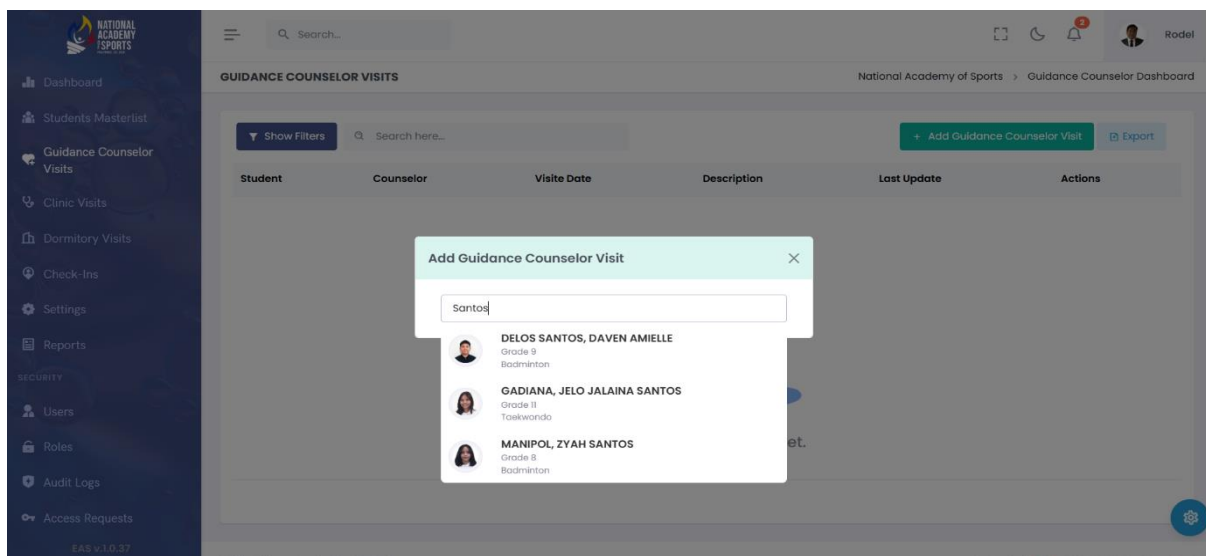

The View All option opens the complete visit history of students who have consulted the Guidance Counselor.

What you can do:

- Browse all recorded guidance visits
- Use the search bar to find a specific student
- Filter visits by date or student

Add Guidance Counselor Visit

Figure 3.3: Add Guidance Counselor Visits Screen

This feature is used to record a new counseling session.

How to add a visit:

1. Click **Add Guidance Counselor Visit**.
2. The system will prompt you to search for a student.

Search Student

Before recording a visit, the student must be selected.

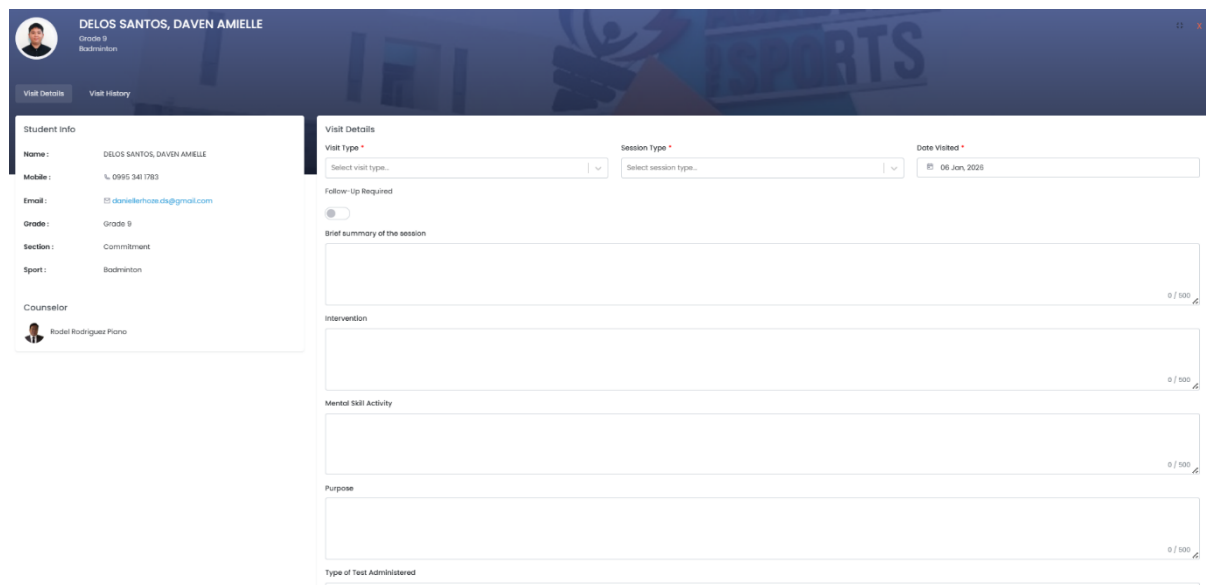

How to search for a student:

- Enter the student name
- Student number
- RFID card number

Once the correct student is selected, proceed to enter visit details.

Visit Details

Figure 3.4: Visit Details Screen

This section captures information about the counseling session.

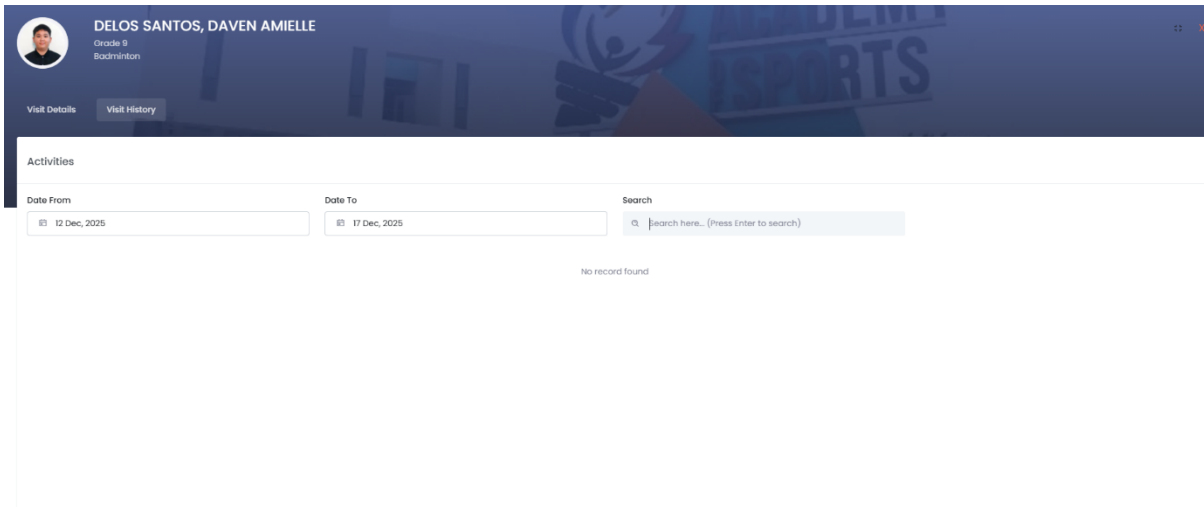

Information recorded includes:

- Date and time of visit
- Type of guidance counseling session
- Counselor remarks or notes
- Summary of Session
- Intervention
- Mental Skill Activity
- Purpose
- Type of Test Administered
- Follow-up requirement (if any)

After completing the details, save the record to store it in the system.

Visit History

Figure 3.5: Visit History Screen

DELOS SANTOS, DAVEN AMIELLE
Grade 9
Badminton

Visit Details Visit History

Activities

Date From: 12 Dec, 2025 Date To: 17 Dec, 2025 Search: Search here... (Press Enter to search)

No record found

The Visit History shows all past guidance counselor visits of a student.

What you can see:

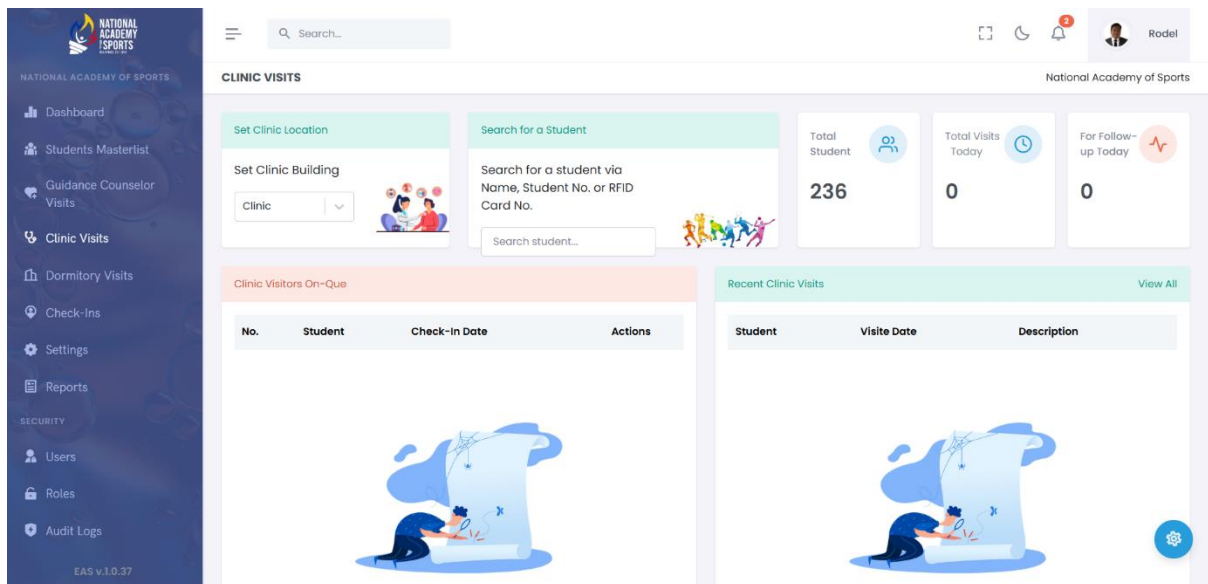

- Complete list of previous counseling sessions
- Dates and descriptions of visits
- Follow-up notes

Why Visit History is important:

- Helps counselors understand recurring concerns
- Supports proper student guidance and monitoring
- Ensures continuity of care

8. Clinic Visits

Figure 4.1: Clinic Visits Screen

The **Clinic Visits** module is used to record and monitor student visits to the school clinic. This helps medical staff track health concerns, treatments given, and follow-up care in a clear and organized manner.

This module ensures that all clinic-related interactions are properly documented for reference, reporting, and student welfare monitoring.

What you can see:

- Search bar to find students by:
 - o Student Name
 - Student Number
 - RFID Card Number
- Summary cards showing:
 - o Visits Today
 - Students for Follow-up
 - Total Clinic Visits
- Recent Clinic Visits – Displays the latest recorded clinic visits

Recent Clinic Visits

This section shows a list of the most recent student visits to the clinic.

What you can see:

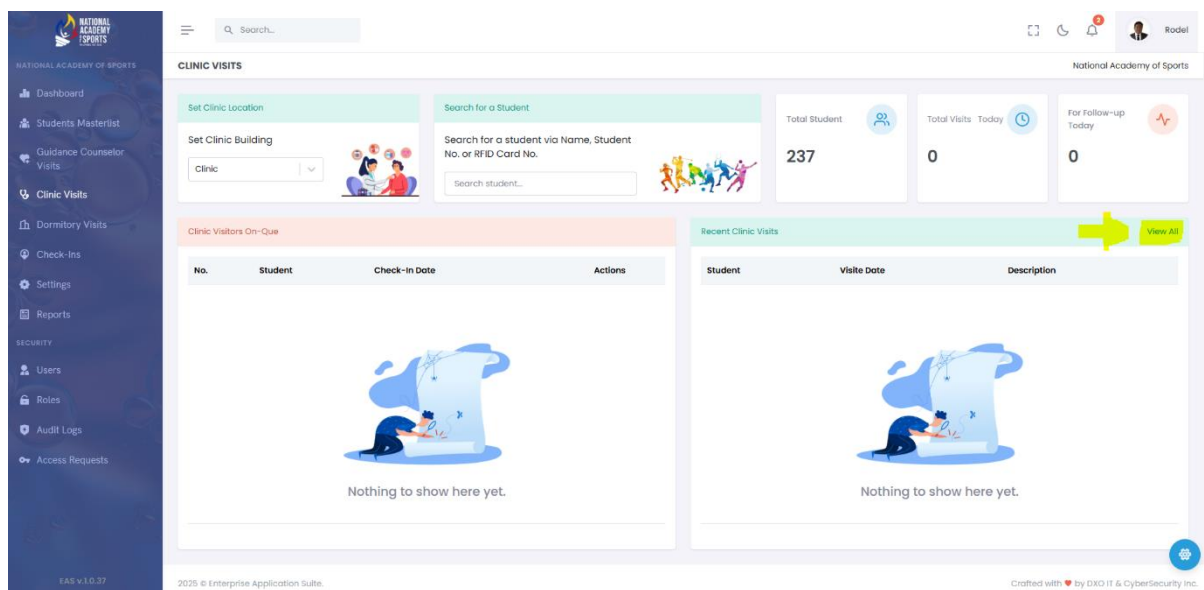

- Student name and basic details
- Date and time of visit
- Reason for clinic visit
- Initial remarks or treatment notes

How to use:

1. Review recent visits to monitor student health trends.
2. Click **View All** to see the complete list of clinic visits.

View All Clinic Visits

Figure 4.2: View All Clinic Visits Screen

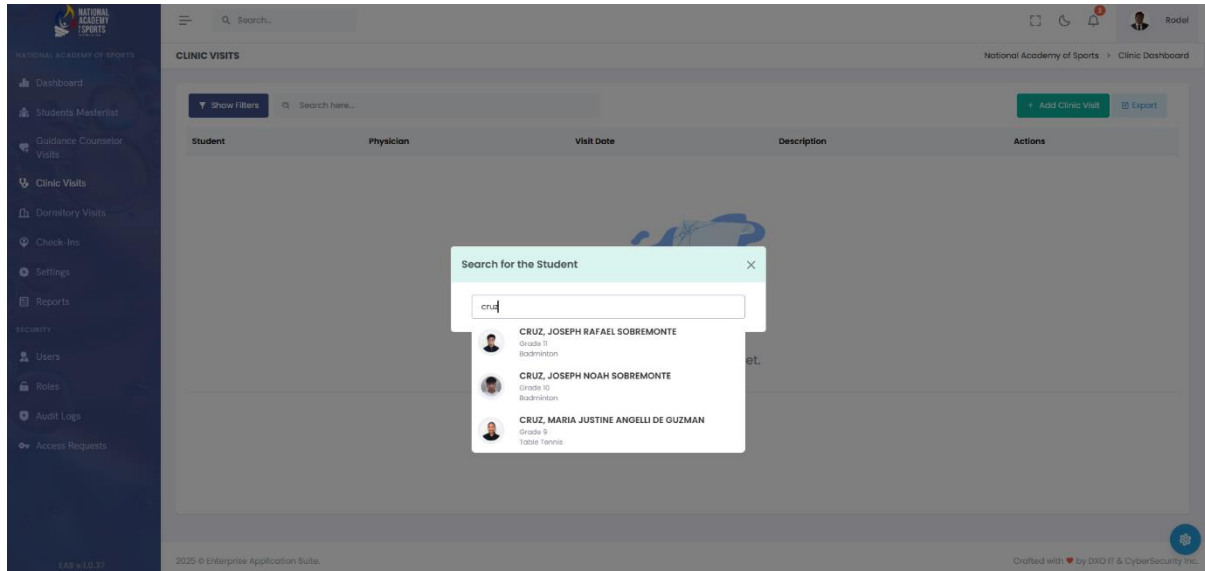

The View All option displays the full history of clinic visits recorded in the system.

What you can do:

- Browse all clinic visit records
- Search for a specific student
- Filter visits by date or visit type

Add Clinic Visit

Figure 4.3: View Add Clinic Visit Screen

This feature is used by clinic staff to record a new clinic visit.

How to add a clinic visit:

1. Click **Add Clinic Visit**.
2. The system will prompt you to search for the student.

Search Student

Before recording a clinic visit, the correct student must be selected.

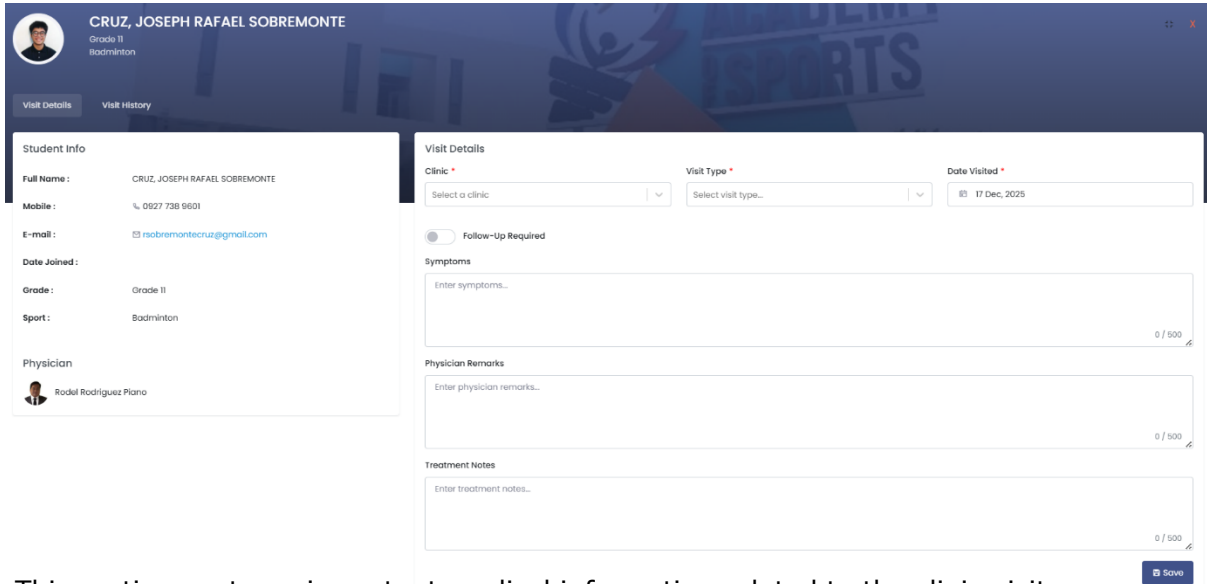

How to search:

- Enter the student name
- Student number
- RFID card number

Once the student is selected, proceed to enter visit details.

Visit Details

Figure 4.4: View Visit Details Screen

The screenshot shows the 'View Visit Details' screen for a student named CRUZ, JOSEPH RAFAEL SOBREMONTTE, Grade 11, Badminton. The screen is divided into two main sections: 'Student Info' and 'Visit Details'.

Student Info:

- Full Name: CRUZ, JOSEPH RAFAEL SOBREMONTTE
- Mobile: 0927 738 9601
- E-mail: rsobremontecruz@gmail.com
- Date Joined:
- Grade: Grade 11
- Sport: Badminton
- Physician: Rodol Rodriguez Plano

Visit Details:

- Clinic: Select a clinic
- Visit Type: Select visit type...
- Date Visited: 17 Dec, 2025
- Follow-Up Required: ☐
- Symptoms: Enter symptoms... (0 / 500)
- Physician Remarks: Enter physician remarks... (0 / 500)
- Treatment Notes: Enter treatment notes... (0 / 500)
- Save button

This section captures important medical information related to the clinic visit.

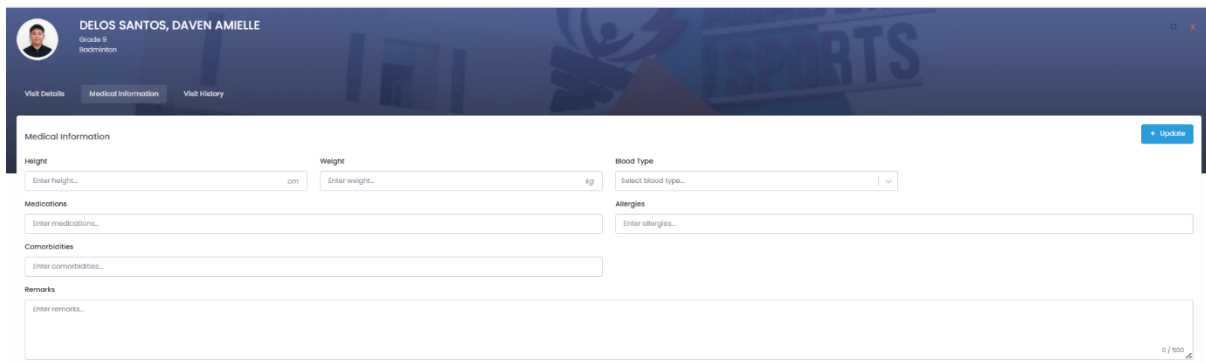

Information recorded includes:

- Date and time of visit
- Reason for visit (e.g., headache, injury, illness)
- Treatment given or action taken
- Clinic staff remarks
- Follow-up requirement (if needed)

Save the information to record the visit in the system.

Medical Information Details

Figure 4.4: View Medical Information Screen

The screenshot shows the 'View Medical Information' screen for a student named DELOS SANTOS, DAVEN AMIELLE, Grade 8, Badminton. The screen is divided into two main sections: 'Medical Information' and 'Visit Details'.

Medical Information:

- Height: Enter height... cm
- Weight: Enter weight... kg
- Blood Type: Select blood type...
- Medications: Enter medications...
- Allergies: Enter allergies...
- Comorbidities: Enter comorbidities...
- Remarks: Enter remarks... (0 / 500)
- Update button

This section captures important medical information related to the clinic visit.

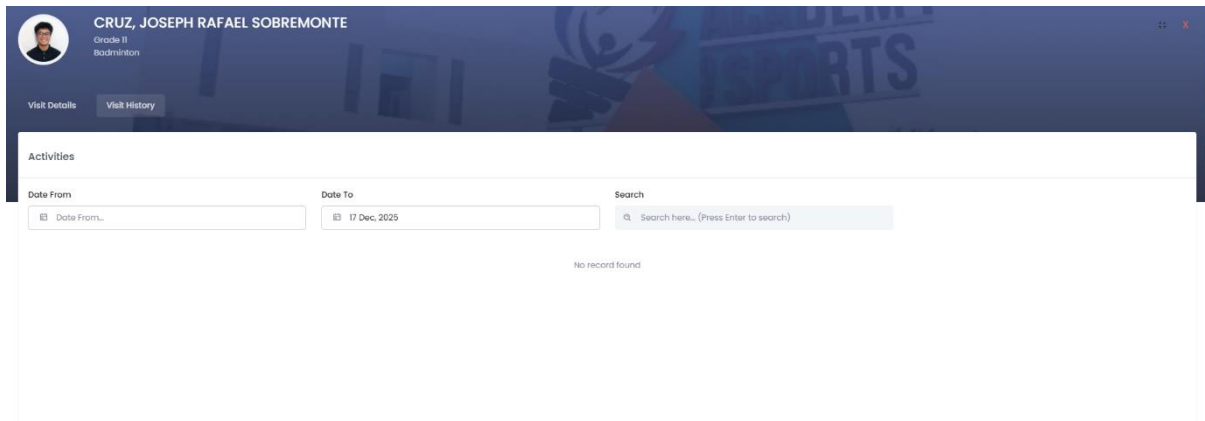

Information recorded includes:

- Height
- Weight
- Blood Type
- Medication
- Comorbidities
- Remarks

Update the information to record the Medical Information in the system.

Visit History

Figure 4.6: View Visit History Screen

The screenshot shows the 'View Visit History' interface for a student named CRUZ, JOSEPH RAFAEL SOBREMONTA, Grade 11, Badminton. The interface includes a header with the student's profile, two tabs: 'Visit Details' and 'Visit History' (which is active). Below the tabs is a section titled 'Activities' containing three input fields: 'Date From' (with a calendar icon), 'Date To' (set to 17 Dec, 2025), and a 'Search' bar with the placeholder text 'Search here... (Press Enter to search)'. The main content area below these filters is empty and displays the message 'No record found'.

The Visit History displays all previous clinic visits of the selected student.

What you can see:

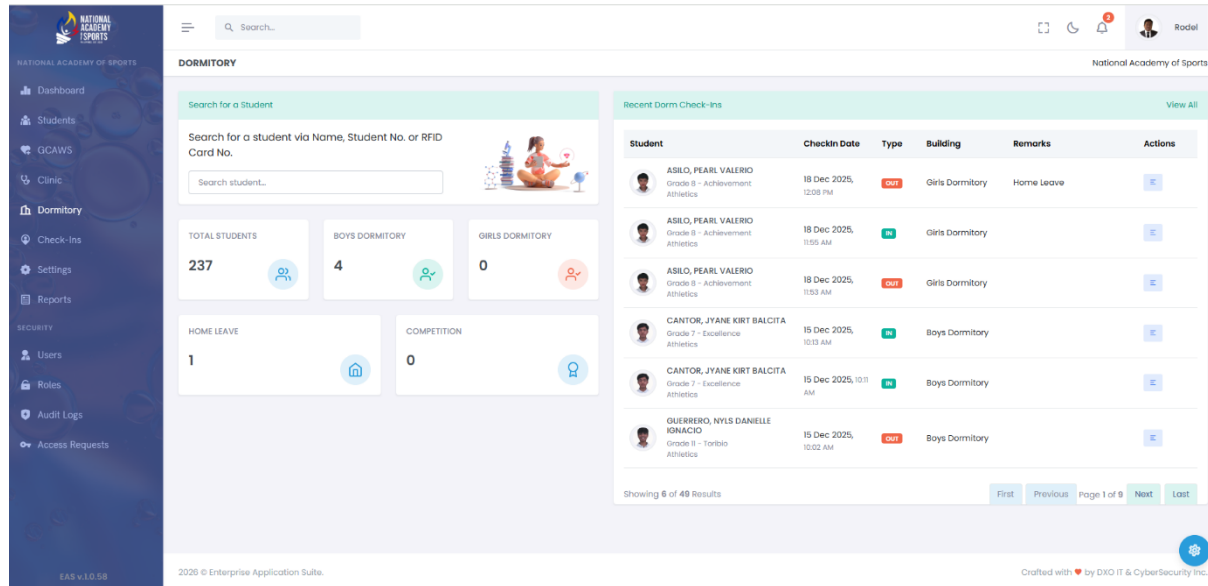

- Complete list of past clinic visits
- Visit dates and reasons
- Treatments and remarks
- Follow-up notes

Why Visit History is important:

- Helps medical staff understand recurring health concerns
- Supports continuity of care
- Provides reliable records for reporting and review

The Dormitory module is used to monitor and manage student movements in and out of the dormitory. This helps ensure student safety, accountability, and proper tracking of dormitory access.

What can you see:

- Student Name and Photo
- Grade and Sport
- Check-in Date and Time
- Visit Type (**IN / OUT**)
- Building Name (e.g., Boys/Girls Dormitory)
- Remarks
- Action (e.g., Home Leave, Set Competition)

Available actions:

- Use **Search** to locate specific records
- Apply **Filters** for better tracking
- Click **Export** to download records
- Action Menu – Allows authorized users to:
 - **Set Home Leave** – Tag a student as officially allowed to go home (e.g., weekends)
 - **Set Competition** – Tag a student as out for an official competition or sports event

How to use Dormitory Visits:

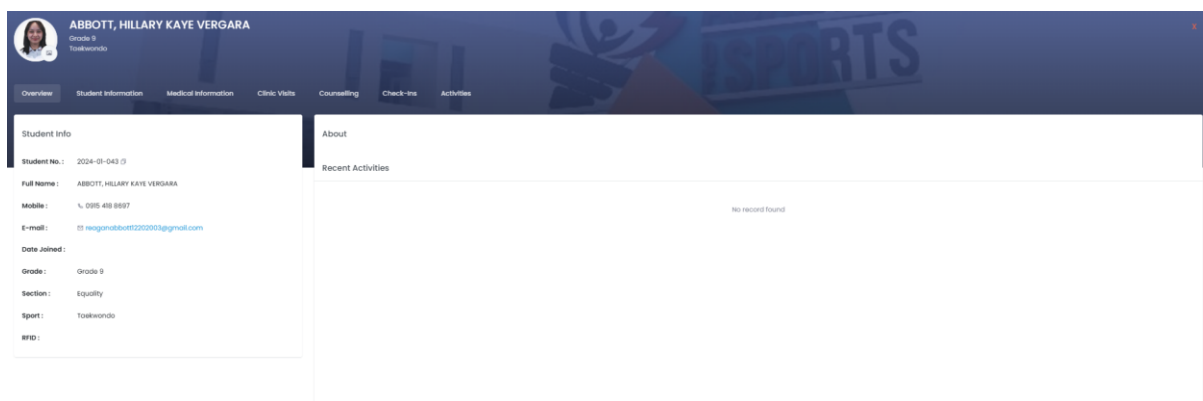

1. Review real-time IN and OUT statuses.
2. Use filters to narrow results by date or student.
3. Export reports when needed.

Viewing a Student Record

When you **click on a student name**, the system opens the student's detailed profile. This profile is divided into several easy-to-understand sections.

Student Profile – Overview

Figure 5.2: Overview Screen

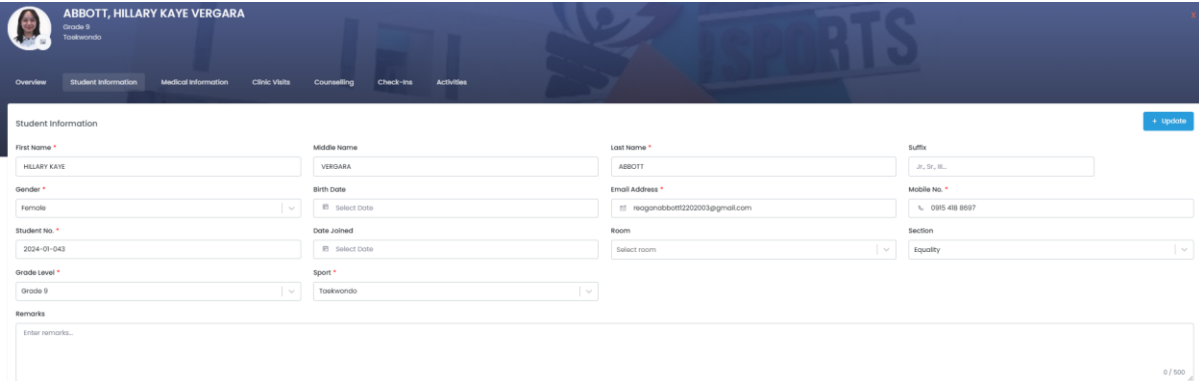

The **Overview** section provides a quick summary of the student's profile.

What you can see:

- Student full name
- Student number
- Current status (Active or Inactive)
- Assigned RFID card
- Recent activity summary

This screen is used to **record student time-in and time-out** using **RFID cards connected to biometric or clock-in devices**. It ensures accurate monitoring of student movement and attendance within the campus.

What is RFID?

RFID (Radio Frequency Identification) works by tapping or scanning a student's RFID card on a registered device. The device automatically records:

- Student identity
- Date and time
- Location of the scan
- Whether the action is **IN** (entry) or **OUT** (exit)

This process is fast, secure, and minimizes manual errors.

What you can see:

- Student name and ID
- RFID card number
- Time and date of scan
- Device or location used
- Status (IN)

How RFID / Biometric Check-In works:

1. The student taps their RFID card on the registered biometric or clock-in device.
2. The system automatically detects the student information.
3. The system records the action as:

- **IN** – when the student enters a location
- **OUT** – when the student exits a location

4. The record instantly appears in the Check-Ins list.

Manual Check-In (if RFID is unavailable):

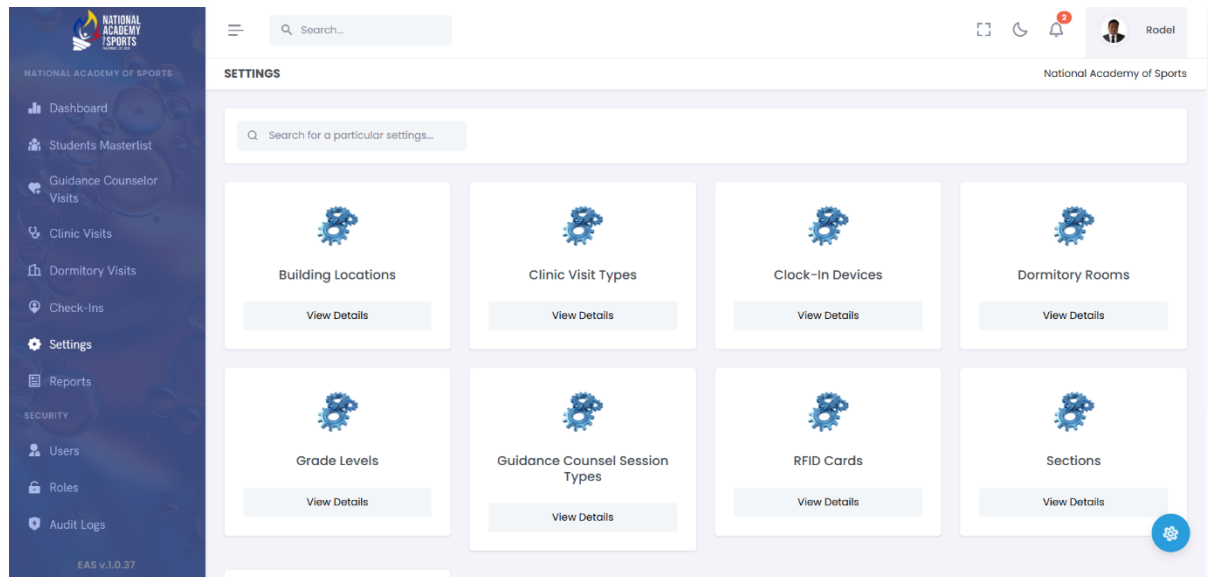

1. Search for the student by name or ID.
2. Select the appropriate IN or OUT action.
3. Confirm the entry.

Important reminders:

- Ensure students tap their RFID card properly on the device.
- Always verify the IN/OUT status if a student reports an issue.
- RFID records are automatically stored for reporting and audit purposes.

11. Settings

Figure 7: Settings Screen

The Settings module allows administrators to manage system configuration.

What you can see:

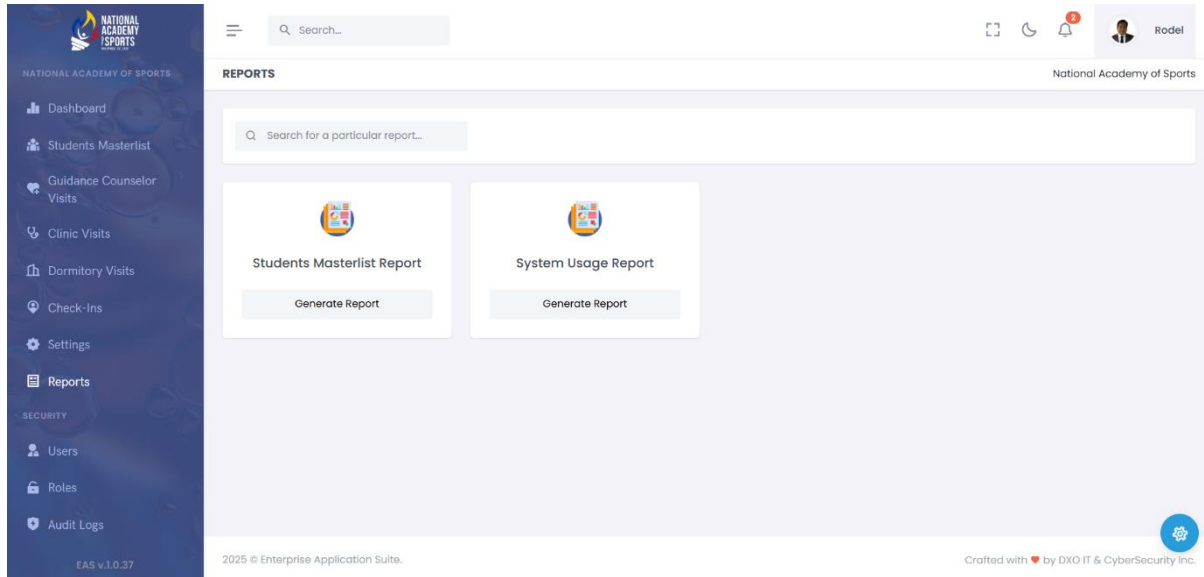

- Building Locations
- Clinic Visit Types
- Clock-In Devices
- Dormitory Rooms
- Grade Levels
- Guidance Counsel Session Types
- RFID Cards
- Sections

How to use Settings:

1. Select a settings category.
2. Click **View Details**.
3. Add, edit, or update information as required.

12. Reports

Figure 8: Reports Screen

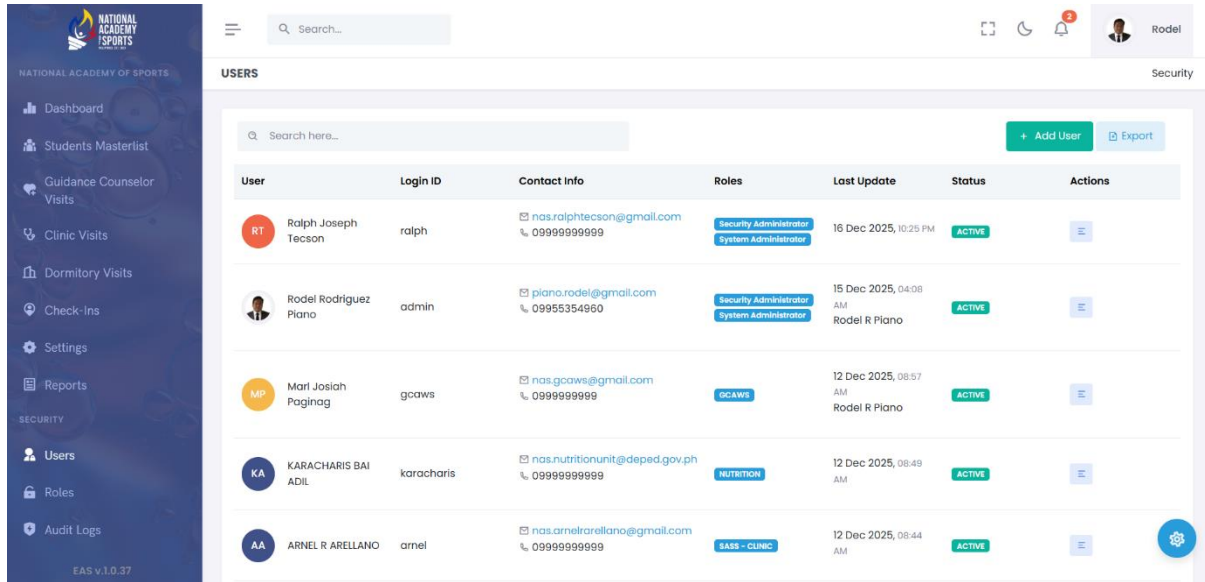

This module allows users to generate and export system reports.

How to use:

1. Select the report type.
2. Choose date range.
3. Export the report.

13. Users

The **Users** module is where administrators manage all system users who are allowed to log in to the NAS system. This ensures that only authorized personnel can access specific features and data.

What you can see:

- A search bar to quickly find a user by name or login ID
- A list of users showing:
 - User Name
 - Login ID (username used to log in)
 - Contact Information (email and phone number)
 - Assigned Role(s)
 - Last Update (date and time of last change)
 - Status (Active or Inactive)
- **Add User** button to create a new user account
- **Export** button to download the user list

How to add a new user:

1. Click the **Add User** button.
2. Enter the user's basic information (name, email, phone number).
3. Assign the appropriate **Role** (example: Nutrition, Clinic, and Security Administrator).
4. Set the login ID and initial password.
5. Save the user details.

Managing existing users:

Click the **Actions** menu to:

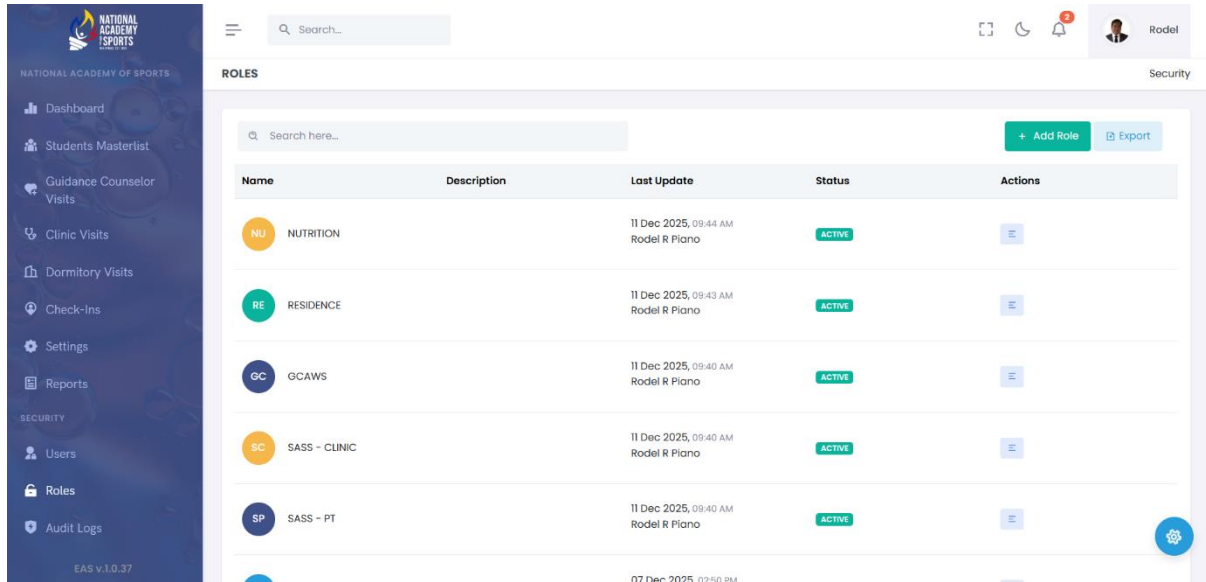

- Edit user information
- Delete a user account
- View audit logs related to the user

Important reminders:

- Assign roles carefully, as roles control what a user can see and do in the system.
- Deactivate users who no longer need system access to maintain security.

14. Roles

Figure 10: Roles Screen

Name	Description	Last Update	Status	Actions
NU	NUTRITION	11 Dec 2025, 09:44 AM Rodel R Piano	ACTIVE	[Edit] [Delete]
RE	RESIDENCE	11 Dec 2025, 09:43 AM Rodel R Piano	ACTIVE	[Edit] [Delete]
GC	GCAWS	11 Dec 2025, 09:40 AM Rodel R Piano	ACTIVE	[Edit] [Delete]
SC	SASS - CLINIC	11 Dec 2025, 09:40 AM Rodel R Piano	ACTIVE	[Edit] [Delete]
SP	SASS - PT	11 Dec 2025, 09:40 AM Rodel R Piano	ACTIVE	[Edit] [Delete]

The **Roles** module defines what actions each type of user is allowed to perform in the system. Roles help keep the system organized and secure by limiting access based on job responsibility.

What you can see:

- Search bar to locate a role quickly
- List of roles showing:
 - o Role Name
 - Description
 - Last Update (date, time, and user who made changes)
 - Status (Active)
- **Add Role** button
- **Export** button

Common role examples:

- Nutrition
- Residence
- Guidance Counselor
- Clinic
- System Administrator

How to add a new role:

1. Click **Add Role**.
2. Enter the role name and description.
3. Assign the necessary permissions.
4. Save the role.

Managing roles:

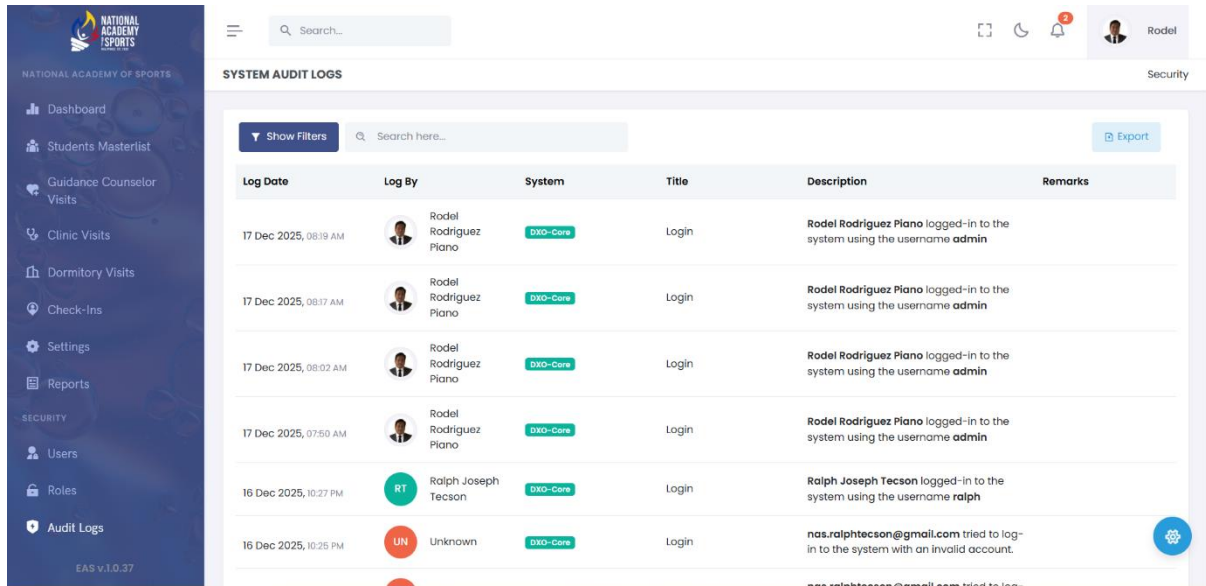

- Use the **Actions** menu to:
 - Edit role details
 - Delete roles that are no longer needed
 - View audit logs
 - Manage permission types

Important reminders:

- Roles should match real-life responsibilities.
- Avoid giving full access unless absolutely necessary.

The **System Audit Logs** module keeps a complete record of all important activities in the system. This is essential for monitoring security, accountability, and system usage.

What you can see on the Audit Logs screen:

- Log Date and Time
- User who performed the action
- System or module affected
- Action title (example: Login)
- Description of the activity
- Remarks for additional details
- **Show Filters** button to narrow down logs
- Search bar to quickly find specific activities
- **Export** button for reporting

Common activities recorded:

- User logins and logouts
- Failed login attempts
- Changes to users and roles
- System configuration updates

How to use Audit Logs effectively:

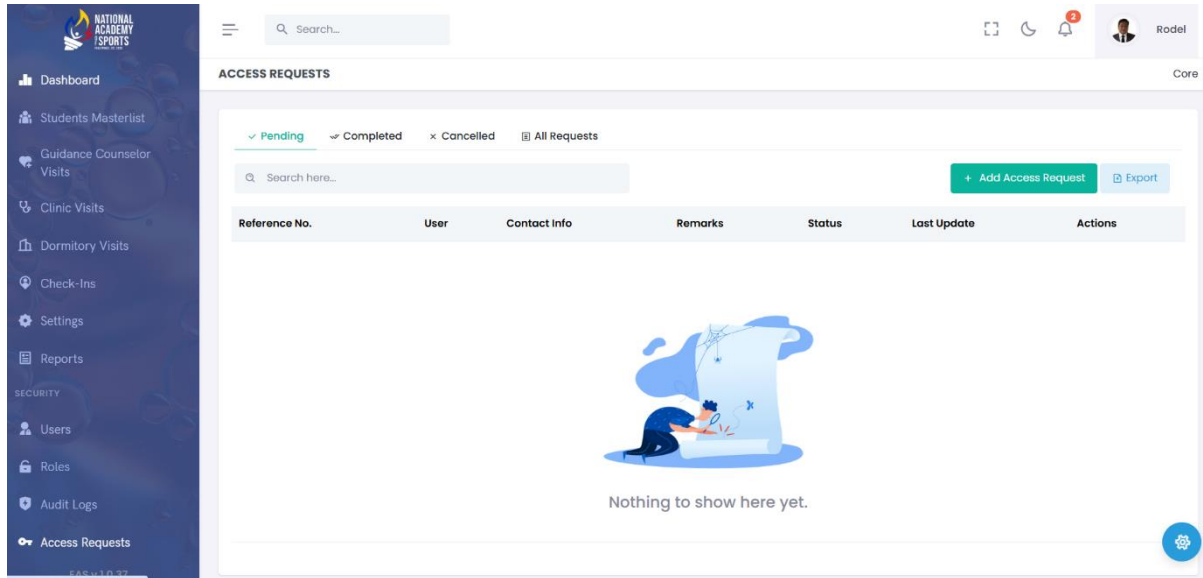

1. Use filters to view logs by date or user.
2. Review failed login attempts for security monitoring.
3. Export logs when needed for reports or investigations.

Important reminders:

- Audit logs cannot be edited or deleted.
- Logs help ensure transparency and accountability.
- Regular review is recommended for system security.

16. Access Request

Figure 12: Access Requests Screen

The **Access Request** module is used when a user needs **permission to access the system** or requires **additional access rights** (for example, access to specific modules or features).

This process helps ensure that system access is **properly approved, tracked, and secured**.

What you can see:

- Tabs showing request status:
 - **Pending** – Requests waiting for approval
 - **Completed** – Approved and processed requests
 - **Cancelled** – Requests that were withdrawn or denied
 - **All Requests** – Complete list of all access requests
- Search bar to quickly find a request
- List columns including:
 - Reference Number
 - User Name
 - Contact Information
 - Remarks
 - Status
 - Last Update
 - Actions
- **Add Access Request** button
- **Export** button for reporting purposes

How to submit an Access Request:

1. Click the **Add Access Request** button.
2. Enter the required information, such as:
 - o User name
 - Contact details
 - Reason for access request
3. Submit the request.
4. The request will appear under the **Pending** tab.

How Access Requests are processed:

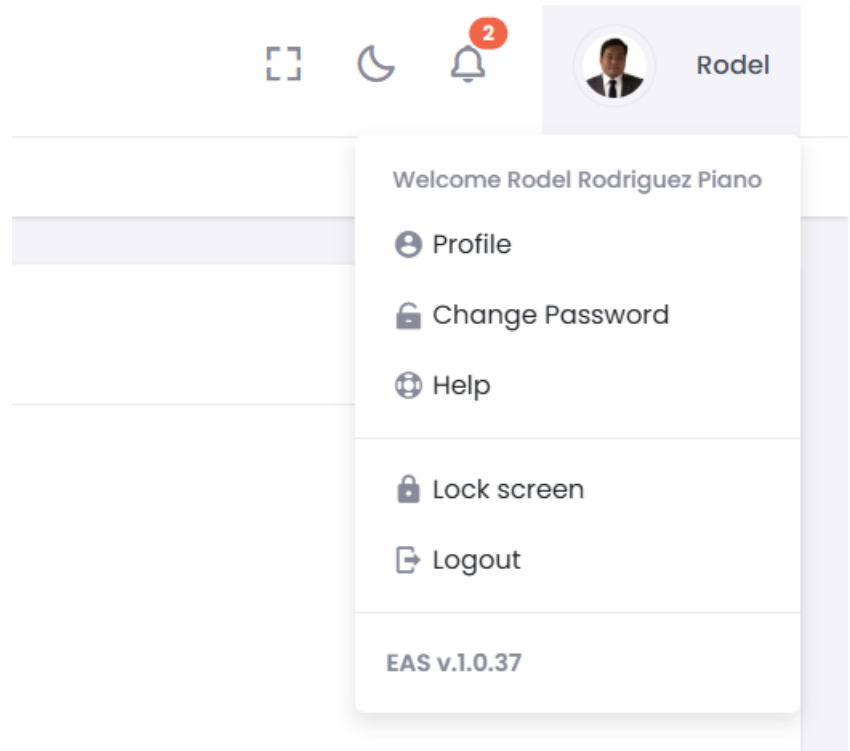

1. An administrator reviews the request.
2. The administrator may approve or cancel the request.
3. Once processed, the request status changes to **Completed** or **Cancelled**.
4. All actions are recorded for tracking and audit purposes.

Important reminders:

- Always provide clear and accurate reasons when submitting a request.
- Check the request status regularly for updates.
- Approved access changes may require logging out and logging back in to take effect.

17. Account Menu

Figure 13: Account Menu Screen

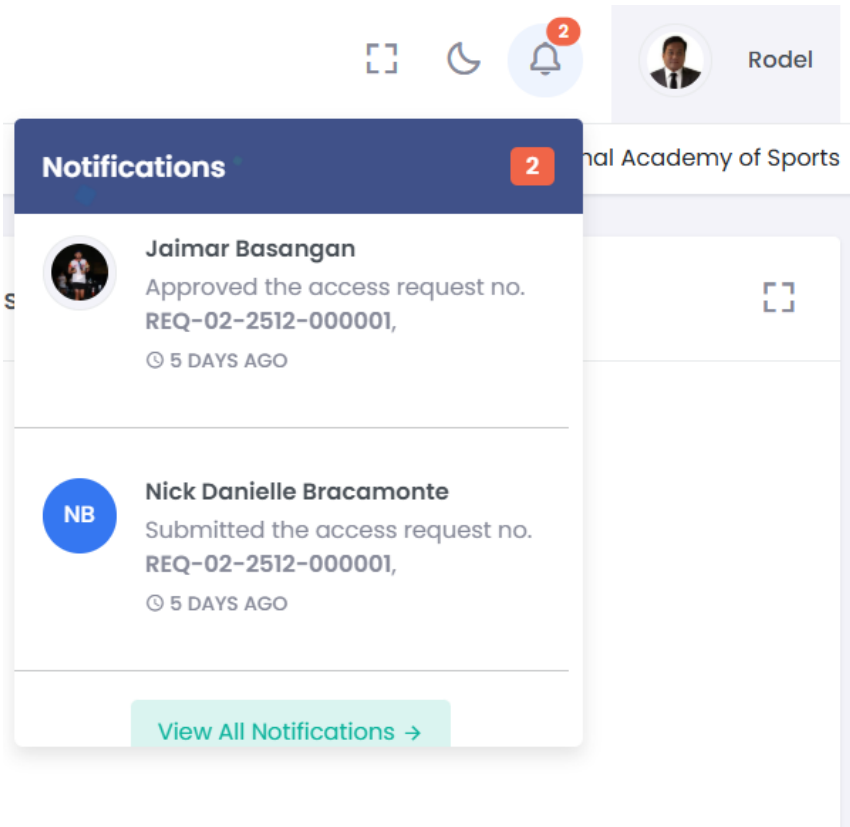

This menu allows users to manage their account.

Options include:

- View Profile
- Change Password
- Lock Screen
- Logout

18. Notification

Figure 14: Notification Screen

This panel displays system alerts and updates.

How to use:

1. Click the notification icon.
2. Review system alerts.
